Contactless linear position transducer with innovative GEFRAN ONDA magnetostriuctive technology for longer lifetime.

The absence of electrical contact on the cursor eliminates all wearing and guarantees almost unlimited life.

The new ONDA technology solution (patented by Gefran) allows to obtain an essential modular structure with compact size for simple installation.

ANALOG OUTPUT

The ONP1-A magnetostrictive transducers provide a direct voltage or current analogue output proportional to the magnetic cursor's position. Since the output is direct, no signal electronic processing is required if interfaced with controllers or measurement instruments.
